

# pitch deck

innovation everywhere

# introduction

Welcome to SafeSite USA, a leader in construction site security and access control solutions. With over a decade of industry expertise and a patented approach to site safety, SafeSite USA is dedicated to safeguarding America's most ambitious projects. Our mission is to deliver innovative, reliable, and scalable access control systems that empower contractors to build with confidence.

From high-rise developments to complex industrial facilities, SafeSite USA provides advanced turnstiles, interior access control, and intelligent reporting systems tailored to the evolving needs of commercial construction. Our solutions are trusted by top general contractors nationwide, ensuring that every site remains secure, compliant, and efficient.

At SafeSite USA, we view every project as a partnership—an opportunity to enhance security, streamline operations, and support our clients' success. By combining proven technology with a deep understanding of construction environments, we consistently set new standards for safety and accountability on every jobsite.

# about us

At SafeSite USA, transformation isn't just a goal—it's our standard. In an industry where security and accountability can't afford to stand still, we never do. SafeSite USA today is unrecognizable from six months ago, and six months from now, we'll have reinvented ourselves again. That's the pace of true innovation.

With over thirty years in the construction industry, we engineer robust turnstiles and advanced access control systems that set the benchmark for reliability and ease of use. But what truly sets us apart is our relentless drive to push boundaries. Every solution we deliver is born from a culture of continuous improvement—anticipating challenges, embracing new technology, and redefining what's possible for our clients.

We don't just build products; we build trust. Our mission is to simplify security, empower our partners, and act decisively. Guided by honesty, transparency, and a commitment to excellence, SafeSite USA is the team industry leaders rely on to protect what matters most—today, tomorrow, and into the future.

PIONEERING TEMPORARY ACCESS CONTROL

**SAFE SITE USA**

# services

SafeSite USA delivers a fully integrated site security and accountability ecosystem tailored for demanding environments. Our core solutions include industrial-grade turnstiles and advanced surveillance cameras, providing robust access control and real-time site monitoring for construction projects, events, and critical infrastructure nationwide. Every deployment is fully customizable, ensuring seamless integration with your operations and meeting the specific requirements of your project.

Our platform Top Flight extends beyond access control, offering a comprehensive suite of smart sensors, gun detection and on-site drug testing—to proactively address safety and compliance risks. Sophisticated reporting and analytics tools provide instant visibility into workforce attendance, site activity, and incident trends, empowering you to make informed, data-driven decisions. With SafeSite USA, you gain a unified system that not only safeguards your assets but also streamlines compliance, enhances operational intelligence, and sets a new industry standard for security, accountability, and peace of mind.

## 3rd Party Applications

Now our applications to communicate and exchange data with your system. This standardized interface allows for efficient interoperability, enabling the project team to leverage the functionalities of external applications and enhance the overall capabilities of the integrated software ecosystem..

## IoT Integration

Enabling seamless integration between various devices and systems, fostering interoperability. This facilitates real-time data exchange and collaboration, enhancing construction efficiency by providing a unified platform for monitoring, analyzing, and managing diverse IoT devices and applications on the construction site.

## Employee Parking Credentials

Streamlines employee parking by automating access control, allowing authorized vehicles to enter without manual intervention. This enhances security and efficiency in managing parking spaces, providing a more organized site..

## Traffic Management

AI-powered camera designed for comprehensive traffic studies and management. This innovative technology aims to enhance urban planning and traffic flow efficiency by providing real-time data and analytics..

## Turnstiles Gateways and Hand Helds

Construction and event turnstiles enhance project security by regulating access to sites, ensuring only authorized personnel can enter. They also contribute to workforce management by providing accurate attendance tracking, helping project managers monitor and control site access efficiently. We offer a variety of turnstile types with multiple reader options, as well as a proprietary gateways & handheld mobile device that logs into the project or event page—ensuring accountability for both construction sites and events.

## 2026 Ativo Sensors

Outdoor sensors designed to complete the SafeSite ecosystem, delivering real-time monitoring for everything from rodent activity to fire extinguisher status, vibration, and sound. With Ativo, you gain actionable insights across your site—enhancing safety, compliance, and operational awareness.

## Security

AI can enhance security cameras by enabling advanced video analytics, allowing for real-time threat detection, and the automatic identification of unusual activities or objects. This technology improves overall surveillance capabilities, reducing response times and enhancing the effectiveness of security systems.

## Safety

Analyzing real-time data from sensors and cameras to identify potential hazards, alerting workers and supervisors to prevent accidents. By automating safety monitoring, AI contributes to a proactive approach, improving overall safety protocols and reducing the risk of on-site incidents.

# SMART CONSTRUCTION TURNSTILES

## BENEFITS OF CONSTRUCTION TURNSTILES

**Enhanced Security :** Controls access to construction sites, preventing unauthorized entry

**Compliance assurance:** Ensures compliance with safety regulations and industry standards

**Integration with Technology:** Our open platform can be integrated with your system for comprehensive site management

**Improved Safety:** Monitor who enters & exits, reducing the risk of accidents or incidents

**Attendance tracking:** Helps track personnel attendance for the change order or scheduling adherence

**Data insights:** Provides valuable data on entry times & visitor demographics and many more metrics for informed decision making

**Branding opportunities:** Customizable designs allow from branding elements, reinforcing brand visibility on-site

**Professional Image:** Portrays a professional image, signaling a commitment to security and project management

**Deterrence of theft and vandalism:** Acts as a deterrent to potential theft of vandalism by restricting access to authorized personnel

These benefits collectively contribute to improved security, safety and operational efficiency on construction sites, which can positively impact projects outcomes and stakeholders perceptions

# Next-Gen Safety: Gun Detection and Emergency Notification

SafeSite USA's AI-powered gun detection and emergency response solution brings advanced, proactive security to construction sites and events. Our system uses real-time video analytics to identify visible firearms, leveraging triple-layer verification—AI detection, cloud-based review, and human confirmation—to minimize false alarms and ensure accuracy. When a threat is detected, instant alerts are sent to site security and 911, with seamless camera sharing for rapid law enforcement response. Fully integrated with SafeSite USA's robust security infrastructure, this technology is designed to protect workers, guests, and assets, delivering peace of mind and faster, more effective emergency intervention.

# our vision for the future

is where construction sites are safer, smarter, and fully accountable through seamless access control and real-time data-driven solutions.

## Turnstiles & Gateways

We envision turnstiles as the intelligent gateway to every jobsite—automating access, ensuring only authorized personnel enter, and providing the foundation for total site accountability

## Cameras & Surveillance

Our vision is for cameras to be proactive site guardians, delivering real-time visibility, advanced threat detection, and actionable insights that keep people and assets secure

## IOT Sensors

We see IoT devices creating a connected ecosystem on every project, continuously monitoring environmental conditions, safety equipment, and site activity to drive smarter, faster decisions

## Reporting & Analytics

Our vision is to empower teams with instant, intuitive reporting and analytics—turning raw site data into clear metrics and trends that drive safety, efficiency, and project success

# CUSTOMIZED SUPPORT

At SafeSite USA, we are visionaries dedicated to transforming spaces into thriving, sustainable environments that enhance quality of life. As leaders in the commercial construction industry, our experienced team combines innovative practices with a client-focused approach to deliver exceptional results. We also specialize in API integration and system customization, enabling us to seamlessly connect your back end systems with our solutions for a truly unified and efficient experience.
